Before starting the application, connect the smart box to the computer with a USB cable and power up the smart box from the tool controller. If USB drivers are not present on the PC the first time the smart box is connected the Windows will display the prompt to install the drivers. Follow the prompt and install drivers from Drivers subfolder. Once the drivers have been completely installed, start the application file, APP.exe.

1.2 Introduction

When first starting the Upload/Download application, the main screen will appear. Below is a summary description of the Main screen functions.

🐖 Smart Box, ver 1.0 rev	B			
	Main			
Main	Devices			
	COM6 -	Scan	Upload	Load
		Connect	Save	Download
		Serial Number Firmware Version		
	Log

1.4 Uploading and Saving

Once connected, all recipes can be uploaded from the Smart Control box to the PC memory by pressing the UPLOAD button. This will read all the current recipes in the connected Smart Control box. The reading of all the recipes will be seen in the STATUS line at the bottom of the screen. Once all the recipes have been loaded, it is possible to save the recipe file to the hard drive on the PC by selecting the SAVE button. Select the destination for the file as seen in the screen capture below:
